

Coronavirus

Mitigate the risk...with *Oncidium's Occupational Nurse Screening Program.*

Occupational Nurse Screening Program

Oncidium's occupational nurse screening program can insulate your company and its employees from the coronavirus. The program provides phone screening by an experienced registered nurse with 20+ years of Occupational Health and Emergency Nursing experience.

- Enabling **early and rapid intervention** if an employer has reason to believe an employee has recently travelled or has been in close contact with someone who has travelled to Wuhan;
- Providing access to a Registered Nurse allowing for **telephonic screening** helping to identify the level of risk, if any, of infection. Both employee and employer receiving a non-medical report with recommendations on next steps;
- Contributing to the health and welfare of all employees through directional support;
- Providing **around the clock service** support for companies with rotating shifts;
- Delivering **program flexibility** allowing for the incorporation of effective messaging throughout the workplace highlighting effective healthcare practices and precautions.

Coronavirus

Managing in the workplace ... implementing preventative measures

In January 2020, a novel (new) coronavirus (2019-nCoV) was identified as the cause of an outbreak of pneumonia originating in Wuhan, China.

What is the Coronavirus?

Coronaviruses are a large family of viruses that originate in animals but are known to cause respiratory illness in humans, particularly during the fall and winter months. They can cause diseases ranging from the common cold to more severe diseases such as Severe Acute Respiratory Syndrome (SARS). Some human coronaviruses spread easily between people, while others do not.

What are the symptoms?

Symptoms range from common to severe respiratory illnesses and include:

- Fever;
- Cough;
- Difficulty breathing;
- Myalgia (generalized muscle aches and pains).

The risk of severe disease may be higher for those that have a weakened immune system which may be the case for:

- Older individuals;
- Individuals with chronic disease states
(for example, diabetes, cancer, heart, renal or chronic lung disease).

Oncidium offers a preventative workplace program
